

## Group 12

- What are your skills and strengths? The mini-projects will require a combination of skills, and each cycle has different tools and challenges.

Emil:

Experience with python, java and c#. Quick learner

Max:

C, c++, python, java, unixoid systems, persistency at problem solving

Ronghua:

Java, familiar with data structures

- How do you want to communicate? In person, by e-mail, chat, slack?

We will be using WhatsApp

- How will you keep track of open tasks?

Github

- How do you plan to work? You can use lab computers with pair programming, your own environment, etc.

Own environment

- Is there anyone who cannot be present in lab sessions? How do you compensate for this?

We will aim to work online together for the labs

- What are your ambitions?

Learn and understand the tools and the underlying theoretical ideas which we'll practise in the labs.
